

Use case UC2: Load connections

Primary Actor: User

Stakeholders and Interest: User wants to load connections with a CSV file

Preconditions: The submitted file is an CSV file formatted for the connection object

Success Guarantee (Postconditions): The System contains the connections.

Main success scenario (or basic flow):

The User submits a CSV file. The System creates all the connections in the CSV file and stores them in-memory.

Extensions (or alternative flows): None

Special requirements: None

Technology and Data Variations List: None

Open issues: None
